---

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH  
FOR THE YEAR  
1954

---

PUBLIC HEALTH OFFICERS

Medical Officer of Health: E. J. O'KEEFFE, B.A., M.R.C.S., L.R.C.P., D.P.H.

Sanitary Inspector: N. J. Arney, Cert. R.S.I., S.I.E.J.B., M.S.I.A.  
Certified Meat and Food Inspector.  
(Resigned - 31st. April, 1954. )

J. R. Tanner, Cert. R.S.I., M.S.I.A.,  
Certified Meat and Food Inspector.  
(Appointed - 14th. June, 1954. )

---

Clerk to the Medical Officer of Health

Miss H. L. Haysom.

The Medical Officer of Health holds in addition the following appointments:-

Medical Officer of Health for the Swanage Urban District  
Medical Officer of Health for the Wareham and Purbeck Rural District.  
Assistant Medical Officer, Dorset County Council.

Office accommodation and clerical assistance is provided for the Medical Officer of Health jointly by the Authorities concerned.

The Sanitary Inspector in addition to his statutory duties is also Borough Surveyor and Petroleum Officer.

The Committees of the Council concerned with matters of Public Health are:-

The Law and General Purposes Committee.  
The Waterworks, and Sewerage Works Committee.  
The Housing Committee.

---

PREFACE

Public Health Office,  
12a Institute Road,  
Swanage.

To the Mayor, Aldermen and Councillors of the  
Borough of Wareham

Mr. Mayor, Ladies and Gentlemen,

I have the honour to present to you my Annual Report on the health and sanitary conditions of the Borough of Wareham for the Year 1954.

The Report is set out in sections in the following order:-

	<u>Pages</u>
Statistics .....	2 - 3
Sanitary Circumstances .....	4 - 6
Sanitary Inspection .....	7 - 8
Inspection and supervision of food .....	9 - 10
Housing .....	11 - 12
Prevalence and Control of Infectious Disease.	13
Factories Act .....	14

The health of the Borough, generally speaking, remained satisfactory and there were few cases of notifiable disease throughout the year.

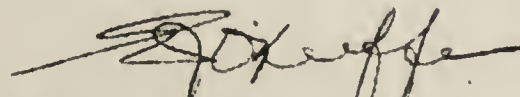

There were 29 more births and 5 more deaths than last year. There were 5 more deaths than births. The Registrar General's estimate of the mid year population is 10 more than the 1951 census figure.

Mr. N. J. Arney your Sanitary Inspector resigned on 31st. April, 1954 on taking up a similar appointment with another local authority. Mr. Tanner who was appointed in his place commenced duties on 14th. June, 1954.

Although the number of houses built by the Council has been more than doubled since the war, there still exists the need for improved housing accommodation for many families in the Borough.

Again, I wish to take this opportunity of thanking the Members of the Council for their kindness and consideration during the year, and my thanks are due to the Sanitary Inspector and other Officers of the Council for their help and co-operation.

I have the honour to be,  
Your obedient servant,

  
Medical Officer of Health

June, 1955.

STATISTICS AND SOCIAL CONDITIONS

General Statistics

1. Area of the Borough	...	...	710 acres
2. Population			
At Census 1951	...	...	2,760
As estimated by Registrar General - mid 1954			2,770
3. Total number of inhabited houses according to the Rate Book -			
At end of 1953	...	...	862
At end of 1954	...	...	890
4. Rateable value at 1st. April, 1954	...	...	£16,812
5. Sum represented by Penny Rate	...	...	£64.9.10d.

SUMMARY OF VITAL STATISTICS FOR THE YEAR 1954

			<u>Total</u>	<u>Male</u>	<u>Female</u>
<u>Live Births</u>

# SANITARY CIRCUMSTANCES OF THE AREA

## WATER SUPPLY

There has been no change in the source of water supply to the Borough; a description of the Council's two wells has been given in past reports. The old well became gradually more and more unsatisfactory and has now been discontinued as a source of supply. The supply is now drawn entirely from the new well.

The untreated water is soft, acid, contains organic matter and is plumbo solvent, and the treatment of the water is designed to alter these characteristics. The water is pumped through an aerating spray to a concrete tower 30 ft. in height where it is dosed with lime. It is then filtered through Permutit pressure filters and chlorinated before it is passed into concrete reservoirs which have a capacity of 320,000 gallons. The results of chemical analyses of the untreated water and treated water will be found on the next page.

The quality of the treated water remained satisfactory throughout the year except for one very brief period when there was disturbance due to work being carried out to the supply mains. As in previous years temporary shortages of water have been experienced at high points in the system, due to difficulty in maintaining pressure rather than shortage of available water. A proposal for the laying of a new 9" main from the reservoir across the common to North Street with a 6" branch running in a northerly direction across the North Causeway to Newport was approved by the Ministry of Housing and Local Government. It is hoped that this new duplicate main will provide an adequate gravitational working pressure in all parts of the Borough and there will be no further need for boosting. During the year one of the pumps at the works was converted to give an increased output, and the Council have now decided to convert the other one to give an average rate of 10,000 gallons per hour.

The average daily consumption of water was approximately 156,000 gallons -

Wareham Borough	...	...	130,000
British Railways	...	...	10,700
Wareham and Purbeck Rural District	...	...	15,300

<u>Water Supply to Houses in the Borough</u>	<u>Percentage of Dwelling Houses</u>	<u>Percentage of Population</u>
<u>From Public Mains</u>		
(a) Direct to dwelling houses	98.43	98.92
(b) By means of standpipe	0.71	0.44
<u>From Private Wells</u>		
(a) Direct to dwelling houses	0.43	0.48
(b) Not piped to dwelling houses	0.43	0.16

## Bacteriological Examination of Water

Description of Water	Total number of samples	Results	
		No. of samples	Faecal B. Coli per 100 ml.
(a)			
Treated water from service taps in the town	44	41	nil
		1	1
		1	3
		1	30
Untreated water - new well	5	4	nil
		1	25
(b)			
Reservoir	5	5	nil

CHEMICAL ANALYSESCertificate of Analysis of a sample of Untreated Water - Worgret Waterworks.

I hereby certify that I have examined the above mentioned sample with the following results: (expressed as parts per million).

Ammonia, free	...	...	0.210	Ammonia, albuminoid	...	0.280
Nitrites	...	...	0.32	Nitrates, as Nitric nitrogen	...	4.74
Oxygen absorbed in 15mins.				Oxygen absorbed in 4 hrs.		
at 80°F	...	...	1.200	at 80°F	...	2.000
Chlorine	...	...	27.5	Chlorine as sodium chloride	...	45.32
Hardness, temporary	...	...	51.25	Total solids	...	146.0
" permanent	...	...	40.00	pH value	...	6.3
" total	...	...	91.25	Metals: Lead, copper, zinc	...	absent
Appearance: colourless & clear				Iron	...	2.20 p.p.m.
Odour: none					...	
Free chlorine: nil				Free Carbon Dioxide	...	80.0 p.p.m.

## Remarks:

This is a moderately soft water of good appearance and organic purity.

It is on the acid side of neutrality and contains a large amount of carbon dioxide: it would, therefore have a corrosive action on metals, particularly lead, iron and zinc. It should be treated to remove the carbon dioxide before circulating in the Mains. The figures show no signs of pollution

(Signed) A. S. CARLOS.  
Public Analyst.

Certificate of Analysis of a sample of Treated Water - Worgret Waterworks

I hereby certify that I have examined the above mentioned sample with the following results: (expressed as parts per million).

Ammonia, free	...	...	0.140	Ammonia, albuminoid	...	0.280
Nitrites	...	...	0.005	Nitrates, as Nitric nitrogen	...	3.71
Oxygen absorbed in 15mins.				Oxygen absorbed in 4hrs.		
at 80°F	...	...	0.888	at 80°F	...	1.403
Chlorine	...	...	38.0	Chlorine as sodium chloride	...	46.14
Hardness: temporary	...	...	70.00	Total solids	...	164.0
permanent	...	...	27.25	pH value	...	7.6
total	...	...	97.25	Metals: lead, copper, zinc	...	absent
Appearance: Colourless and clear.				iron	...	0.42 p.p.m.
Odour: None.					...	
Free Chlorine	...	...	0.04	Free Carbon Dioxide	...	Nil.

## Remarks:

This is a moderately soft water of high organic purity and good appearance. It is on the acid side of neutrality. The figures indicate that the water would not be of a corrosive nature, and in my opinion, is suitable for drinking and domestic purposes.

(Signed) A.S. CARLOS.  
Public Analyst.

## SEWERAGE AND DRAINAGE

There were no major extensions to the sewerage system or the disposal works. The sewerage system, in addition to serving the Borough, receives sewage from 56 houses in the Bestwall area of the Wareham and Purbeck Rural District which lies just outside the Borough boundary. Storm-water as far as is practicable is excluded from the sewerage system and is drained by soakaway pits or through storm-water drains to the rivers Frome and Piddle. There is a storm-water overflow from the south-east pumping station to relieve the volume of flow during storm periods.

A description of the sewerage works and disposal system has been given in previous reports. Great difficulty continues to be experienced in keeping the untreated effluent from escaping untreated into adjoining ditches and streams. During the year three more large lagoons have been excavated and the area is now beginning to present a more regular pattern as far as surface and land filtration is concerned and it will be possible to rest lagoons; when a further series are laid out it will facilitate control of the effluent and keep it within the perimeter of the works.

On very frequent occasions flooding occurs at Abbots Quay due to flooding of the sewers during storms; so much surface water gains access that for a brief moment the system is overloaded.

Number of houses not connected to the sewer	...	5
Number of houses with pail closets	...	2
Number of houses with cesspools	...	2
Number of pail closets abolished during the year		-
Number of cesspools abolished	...	-
Number of houses connected to sewer	...	4
Number of new cesspools	...	-

### Drainage works carried out.

New drainage systems replacing those unsatisfactory		2
Sewers and drains cleared	...	4

## SANITARY INSPECTION OF THE AREA

### Summary of Inspections

Bakehouses	4	Ice cream premises	10
Building Byelaws	69	Infectious diseases	4
Butchers Shops	10	Samples: Water Bact.	55
Dairies	3	Chem.	3
Drainage	28	Sewerage	53
" Tests	5	Water supply	60
Food Premises	28	Workshops/Factories	12
Food Inspection	5	Public Lavatories	10
Houses (Housing Act)	8	Moveable dwellings	4
(Purpose)	228	Miscellaneous	140
(Public Health)	8	Markets	3

Total ..... 750

### Statutory and Informal Notices

The following table shows the action taken to secure the abatement of nuisances and the removal of conditions dangerous or injurious to health:-

<u>Notices</u>	<u>Number served</u>	<u>Complied with</u>	<u>Outstanding</u>
Informal	4	4	-
Statutory	-	-	-

### Miscellaneous work done following service of Notice

	<u>Notices served</u>	<u>Complied with</u>
Obstructed drains cleared ...	3	3
Sanitary accommodation provided ...	1	1

### Disinfection

During the year disinfection of premises, bedding and personal effects was carried out.

Number of visits in connection with infectious diseases	4
Number of visits in connection with verminous children	-
Houses fumigated ...	...
Rooms fumigated ...	3

### Control of Moveable Dwellings.

Planning permission was granted, subject to conditions, to develop the old refuse-tip site at North Causeway as a caravan site for not more than 40 caravans; in addition permission was granted for seven to be occupied all the year round. Regular visits are made to this site to ensure that satisfactory sanitary conditions are maintained.

Verminous premises

No cases of verminous premises were reported during the year.

Refuse Collection and Disposal

House and trade refuse collection is undertaken by the Council and collections are made weekly. Refuse is tipped on a privately owned site on the Puddletown Road in the Rural District.

Swimming Baths

There are no swimming baths in the Borough. Bathing takes place in the river Frome near the Quay during summer months.

Prevention of Damage by Pests Act, 1949

The following is a copy of the Rodent Officer's Report -

<u>Inspections</u>	<u>Local Authority</u>	<u>Dwelling Houses</u>	<u>All others including Business Premises</u>	<u>Agricul- tural</u>	<u>Total</u>
Properties inspected	4	25	42	2	73
Infested by rats	1	3	2	-	6
Infested by mice	-	6	10	-	16
Treated by Local Authority	1	9	5	D.A.E.C.	15

Rat infestation all of a minor character.

INSPECTION AND SUPERVISION OF FOOD

Milk Supply:

The Order made by the Minister of Health under Section 45 of the Food and Drugs (Milk and Dairies and Artificial Cream) Act, 1950, specifying an area, which included the Borough of Wareham, in which the use of special designation in relation to milk sold by retail becomes obligatory, came into force on March 1st. 1954. All milk now sold by retail in the district is either "pasteurised", "tuberculin tested pasteurised" or "tuberculin tested".

Number of milk distributors on Register 31.12.54.                      ...                      3

Milk (Special Designation) Regulations, 1949.

The following licences were renewed by the Council and were in force at the end of the year:-

Dealer's Licence for Tuberculin tested milk	...	...	1
Supplementary Licence to sell Pasteurised milk	...	...	2
Supplementary Licence to sell Tuberculin tested milk	...	...	1

Milk Sampling

The following are particulars of milk samples taken in the district by the Food and Drugs Authority for examination:-

Designation	No. of Samples	Results of Tests			
		Methylene Blue		Phosphatase	
		Passed	Failed	Passed	Failed
Pasteurised	4	4	-	4	-
Tuberculin tested	3	3	-		

<u>Food Inspected and Condemned</u>				<u>Cwt.</u>	<u>Qtrs.</u>	<u>lbs.</u>
Tinned Goods	...	...	...	3	2	13
<u>Meat</u>						
English beef	...	...	...		1	22
Imported beef	...	...	...			7
Pork	...	...	...		2	-
Bacon	...	...	...			15
<u>Fish</u>						
Mackerel	...	...	...			14
Cheese	...	...	...			2
Total weight				4 cwt. 3 qtrs. 17 lbs.		

Method of Disposal of Condemned Meat.

All foods condemned are disposed of by burying.

Food Premises1. Number of Food premises by type of business in the area.

Grocers	...	10	Fish Shops	...	2
Greengrocers	...	4	Fried Fish Shops		2
Butchers	...	5	Sweets & Confectionery		3
Dairies	...	1	Cafes & Restaurants		4
Bakehouses	...	3	Licensed premises		11
			(including 3 hotels)		

2. Number of Food Premises by Type Registered(a) Under Section 14 of the Food and Drugs Act

Manufacture of Sausages and preserved foods	...	8
Fish Frying	...	2
Sale of Ice cream	...	14

(b) Under Milk and Dairies Regulations

Dairy premises	...	1
----------------	-----	---

3. Number of Inspections of Registered Food Premises

Premises for manufacturing sausages	...	9
Fish Frying Premises	...	8
Ice Cream Premises	...	10
Dairy premises	...	4

Cafes, Restaurants and Food Shops

Inspection of these premises during the year showed that in general the standard of cleanliness is satisfactory. In no case was it found necessary to take legal proceedings under the Food and Drugs Act. Any defects found were remedied following informal notice.

Ice Cream (Heat-treatment etc.) Regulations

No action was necessary under these Regulations.

Clean Food Campaigns

There were no educational activities undertaken in the district in connection with clean food campaigns during the year.

No formal action was taken during the year under the Byelaws with respect to the handling, wrapping and delivery of food and sale of food in the open air.

## H O U S I N G

The provisions of the Housing Repairs and Rent Acts, 1954, which came into force on 30th. August, 1954, broadly speaking, facilitate the exercise of the Council's statutory responsibility for the clearance and replacement of unfit houses, the enforcement of essential repairs to render houses fit and the encouragement of improvement of existing houses, and the conversion of houses or other buildings to provide dwellings. The Act requires the Council to submit for the Minister's approval proposals for dealing with houses in their area which appear to them to be unfit for human habitation, and liable for demolition. In order to obtain a reliable estimate of the number of these houses in the district the Council's Sanitary Inspector is carrying out a survey. Generally speaking, one can say that there are relatively few houses in the Borough which will require demolition, and that what is ~~needed~~ in the majority of cases is reconditioning and improvement to bring them up to the standard of amenities and conveniences which have come to be regarded as essential to a healthy and decent life.

During the year one Demolition Order was made and the occupant is to be rehoused on the Kingsbere Estate.

The Council considered the Housing Repairs and Rents Act, 1954, and decided to make Improvement grants under this Act, and by the end of the year grants had been given in respect of four dwellings for the provision of bathrooms, etc. It is expected that more applications will follow.

A total of four houses were built during the year; these were all private enterprise. The housing scheme in Ropers Lane was commenced during the year and some of the bungalows were nearing completion at the end of the year. Eight houses were also in course of erection on the Kingsbere Estate.

The housing application list shows little signs of slackening, but with a further eight bungalows nearing completion it will be possible to move some of the older tenants with no families into these, thus making way for the applicants with larger families to move into the two and three bedroom pre-war houses.

The following shows the number of applicants on the waiting list for Council houses at the end of 1954 -

Persons residing in the Borough	...	...	94
Persons residing outside the Borough	...	...	25

Applications from persons residing within the Borough are sub-divided as follows -

Applications for 3 bedroom houses	...	...	8
Applications for 2 bedroom houses	...	...	22
Applications from childless couples	...	...	17
Applications for Borough bungalows	...	...	47

### Emergency Housing

All houses held under requisition at 31.12.53. have now been de-requisitioned and the families rehoused.

<u>Housing Programme</u>	<u>No. of houses</u>	<u>Completed</u>	<u>Completed</u>
<u>Site:</u>	<u>Proposed</u>	<u>in 1954</u>	<u>since 1945</u>
Bere Road (Kingsbere Estate)	137	-	108

Permanent traditional	103	119	222
Temporary prefabricated bungalows	-	10	10

PREVALENCE AND CONTROL OF INFECTIOUS DISEASE

The incidence of infectious disease in the Borough was low during the year, and apart from those due to pneumonia there were no deaths from notifiable infectious disease.

No cases of poliomyelitis, dysentery or food poisoning were notified, and following the previous year's epidemic of 80 notified cases of measles there was no notification of measles. 20 cases of whooping cough were notified compared with 3 in the previous year. It is hoped that immunisation against this distressing disease will shortly be available in this area.

Notifications (Corrected) Figures

Disease	Total	1st Qtr.	2nd. Qtr.	3rd. Qtr.	4th. Qtr.	Admitted to Hospital
Whooping cough	26	1	13	12	-	-
Acute Pneumonia	1	-	1	-	-	-
Tuberculosis - pulmonary	2	-	1	-	1	2

Cases of Infectious diseases notified during 1954.
